**DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 112***

Claims 28-62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant argues the rejection by arguing that the tables provide support for the claimed ranges but the tables merely provide isolated points of using valine or proline. They do not provide support for such a range. The ranges are clearly in the specification as noted by the examiner in previous office actions in this application. Applicants must limit their claims to such ranges as supported by the specification. The new claims also present more unsupported ranges as noted in the last office action. Ranges such as the ranges in claims 29, 42, 48, 61, etc. do not find support in the instant specification.

***Claim Rejections - 35 USC § 103***

Claims 28-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Segal 1 (of record) in combination with Segal 2 (of record) in view of JP 08187095 and JP 60-224499 and further in view of Sanford et al. (col. 1), De Giorgio et al. (col. 1 and abstract) or Warren et al. (col. 1).

Segal 1 clearly teaches using valine and proline, see Table 1 on page 39.

Applicant argues that the two enzymes (aspartate aminotransferase and alanine aminotransferase) have different characteristics and that one would not expect using them interchangeably as applicants do, but it is clear from Sanford, De Giorgio and Warren that these two enzymes are commonly used interchangeably in typical clinical settings and applicant even admits this fact on page 2 of their own specification.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
